PROFESSIONAL DEVELOPMENT

Urban Medical Center — **Jersey City, NJ**

IT Operations & Systems Manager — April 2022 – Present

- Led the practice-wide EHR migration from Amazing Charts to Elation Health: data migration, vendor coordination, cutover, and staff training, with no disruption to care.
- Secure IT and clinical infrastructure across 3 clinic sites: Active Directory, Windows/Linux, network segmentation, endpoint management, and monitoring; administer Google Workspace and the practice website.
- Administered EMR/EHR platforms: user provisioning, role-based access, audit logging, and HIPAA Security Rule compliance for ePHI.
- Built Python + Playwright automation across the EHR and payer portals (UHC, Wellcare, Availity), eliminating roughly 40 hours of weekly manual work, plus a remittance-analysis pipeline that traced missing remittances to a payer routing problem.
- Designed AI-assisted coding and billing workflows with PHI safeguards: local models and encrypted storage (LUKS, DPAPI) for patient-linked data.
- Led HIPAA self-audit (April 2026): identified exposed OAuth credentials in development environment, rotated all secrets, and migrated to hardened secret management.
- Developing an integration bridge connecting a Welch Allyn CVSM vitals monitor to the EHR to eliminate manual vitals transcription.
- Trained 12+ staff on EHR workflows, HIPAA protocols, and incident reporting.

Medical Biller/Coder — August 2021 – April 2022

- Built data validation workflows catching claim discrepancies pre-submission, enforcing HIPAA compliance and reducing payer denial risk.
- Processed 150+ claims weekly, analyzing denial patterns through systematic troubleshooting and root-cause analysis.
- Office Manager (2019 – August 2021): ran day-to-day practice operations: scheduling, staffing, vendors, and patient flow.
- Medical Assistant, then Billing Support (2017 – 2019): supported clinical operations, then assisted billing with claims preparation and payer follow-up.

Independent Medical Practice — **Hoboken, NJ**

Clinical IT Support Specialist (Part-Time) — October 2018– April 2019

- Deployed and configured EHR systems for 6+ clinicians, managing go-live support and post-implementation troubleshooting.
- Analyzed clinical workflows and recommended EHR configuration changes that reduced documentation time by 15%.

TECHNICAL PROJECTS

- Homelab & Security Lab: self-hosted multi-node lab (Raspberry Pi + Windows/WSL) running automated agent pipelines, threat detection, and API security testing in an isolated environment.
- Elation Integrations (Urban Medical Center): prototyped an OAuth 2.0 REST API client (idempotent writes, safe pagination) and an HL7 v2/MLLP bridge from a Welch Allyn vitals monitor to Elation's vitals endpoint.

CERTIFICATIONS

- AHA BLS Provider (2026)
- OSHA for Healthcare with Bloodborne Pathogens (2026)
- HIPAA Security (2026)
- Healthcare & Billing Practices Compliance (2026)
- Cyber Crimes iQ4/CWA Industry-Recognized Credential (350 OJT Hours, 2021)

SKILLS

- Security & Compliance: HIPAA Security Rule, ePHI handling, incident response, access control, audit logging, secret management, OAuth 2.0 hardening.
- Networking & Infrastructure: Active Directory, Windows/Linux administration, network troubleshooting, system monitoring, endpoint management.
- Automation & Development: Python, Playwright, SQL, REST/FHIR APIs, LLM integration, AI agent pipelines, PHI-safe model routing.
- Healthcare Systems: Elation EHR, Epic (clinical charting), Amazing Charts, FHIR, HL7 concepts.
- Tools: Google Workspace, Microsoft 365, ticketing systems, CMDB.

EDUCATION

Saint Peter's University — **Jersey City, NJ**

Bachelor of Science in Computer Science

International College of Health Sciences (ICHS) — **Boynton Beach, FL**

- Bachelor of Science in Nursing (Traditional BSN), Expected May 2027, GPA 3.81
- Clinical rotations on medical-surgical and inpatient psychiatric units (about 395 hours), charting in Epic: vital signs, tracheal suctioning, insulin injections, tube feeding, Foley catheter care, and bladder irrigation.
